The total number of defects by components

The chart represents defects quantity on separate modules. The majority of issues actual in **"Create Gallery" module (17)** and **"Options" module (13)**.

Quality of separate modules

Module	Quality	Comments
Installation	Below Medium	Among four issues in installation, there is a critical issue (QATC-859782). This issue shows that When Kimba is installed in default disk, a folder is not created if user do Create Gallery. And three remaining issues are Major and Functional.
Uninstallation	Medium	There are two issues that are found for uninstallation process. One is 'Created gallery is not removed after uninstalling Kimba'. And another is 'When user chooses 'Do not close application' during uninstallation process, user can continue using Kimba after uninstalling Kimba'.
Main Window	Below Medium	There are, four defects that are found on Main Window. One of these issue is critical which is connected with Refresh and the issue is QATC-860221 . There is one major issue about the absence of toolbar. Menubar of this Main Window is shown properly. Beside, there is an issue QATC-860188 which shows that Thumbnails is not rearranged according to whether the window is minimized or maximized.
File	Below Medium	This file module has two sub-modules. First one is Create Gallery which has 17 issues. Among of these issues, two of them are critical: QATC-860086 and QATC-859782 . This module can not create the gallery as zip file. And also Auto-Optimize option of Creat Gallery window does not do its' job to enhance colors, sharpen, brightness/contrast of pictures. Sceond sub-module Folder works according to the requirement. For function Refresh, two issue have been found and one of them is critical . And the Exit which is used to close the application works properly.
Edit	Below Medium	The quality of this module is estimated as Below Medium. First four functions for this module works properly which are: Rotate Left, Rotate Right, Flip Horizontal and Flip Vertical. Then, there are ten issues for Optimize, two for Delete, six for Select as cover and, one for Order by random. Functions such as Slider, Auto-Optimize, Red-Eye-Reduction of Optimize do not work. Besides, user can not put EXIF-Data in the table of Optimize. Delete and Select as cover work limitedly. And last function Order by random does not work at all.
Options	Below Medium	The quality of this section is estimated as Below Medium. 13 defects are found in this module. One of the Major issues is related with the Installation which is QATC-860112 . This issue presents that after installing Kimba, it shows options settings that was done before when Kimba was installed previously. And QATC-859938 issue is about setting language.
Help	Low	The quality of this section is estimated as Low. One defect of Help shows that user can not find information about how to use application when they click Help option which is the main function for Help.
